BUTTERFLY TaskFlow

WHY TaskFlow?

Break Free from Legacy Software with **TaskFlow**

Go beyond the fragmented structure of traditional ITSM and business management tools. **TaskFlow brings together human decisions, AI agents, and complex approval processes within a single enterprise orchestration layer.**

FAST MIGRATION WITH ZERO DATA LOSS

Seamlessly migrate project history, tickets, and permissions from your existing tools.

NATURAL AND INTEGRATED AI

Instead of using ai as an external chatbot, use it as a process step that categorizes tickets, anticipates SLA risks, and triggers approvals.

ELIMINATE HIDDEN LICENSING COSTS

Use RPA, integrations, and approval workflows natively within the platform without relying on dozens of plugins.

ORGANIZATIONAL FLEXIBILITY & FULL CONTROL

Design multi-step approval workflows and complex cross-departmental processes with Workflow Studio without getting bogged down in code.

BUTTERFLY TaskFlow

With your own data.
With your own rules.
On your own infrastructure.

SCHEDULE A DEMO SESSION NOW

- Your own service catalog and request types
- Your own approval workflow and SLA rules
- An AI-powered workflow that processes real requests
- Seamless migration of workflows and data from legacy tools.

BUTTERFLY TaskFlow

THE PROBLEM

Work has changed. Work management must change as well.

For years, enterprise work management has been built around teams of people, task lists, and manual approvals. Today, AI agents also contribute to business operations; however, **in most organizations, tasks, service requests, approvals, and information as well as AI continue to exist in separate tools.**

More tools.

More integrations.

Less control.

THE ANSWER

TaskFlow gives human and AI teams common ground.

Project and task management, the service catalog, workflows, approvals, SLAs, and AI-powered operations all operate within the same system. **People and AI agents are both part of the same process.**

THE OUTCOME

One system.

One permission model.

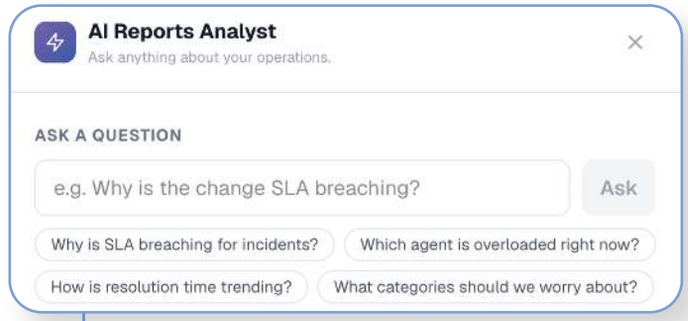

Full traceability.

PLATFORM

One Platform. **End to End Work Management**

Butterfly TaskFlow does more than just track tasks.

It manages the entire process from initiation to completion on a single platform.

SERVICE CATALOG & PORTAL

Capture requests as structured work through defined services not email threads.

WORKFLOW STUDIO

Design states, transitions, and rules to fit your workflow. Create them quickly with AI.

NATURAL LANGUAGE QUERYING

Ask questions in plain language. TaskFlow answers from your data.

APPROVAL WORKFLOWS

Manage multi-step, parallel, and conditional approvals in a single workflow.

BUTTERFLY TaskFlow

Enterprise work management demands **enterprise trust.**

TaskFlow integrates deployment, workflow, AI, and monitoring under a single governance model.

DEPLOYMENT
On-premises
Private cloud
Air-gapped deployment
Runs on your infrastructure

WORKFLOW
Workflow Studio
State Machines
